911 Outages/Remote/Community Isolations:

Landline Outage, Moss Beach, San Mateo County (New / Final)

On 01/02/18, the California State Warning Center (CSWC) received a report from San Mateo County advising they had approximately 2,357 customers that could not call 9-1-1 via landline. Wireless services were not affected.

- Customers were not re-routed to another Public Safety Answering Point (PSAP); however, the county did issue an alert to affected customers, giving them the 10 digit number to dial.
- As of 1625 hours, the cause of the outage (cut fiber) was located and repaired, services were restored.

Service Interruptions:

None reported.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

A high pressure ridge over the west coast will produce dry and warm weather throughout Northern California today. However, a closed low pressure area west of Southern California will move toward central California today and push clouds into the region. The ridge will move east tonight and clouds and S-SW winds will increase over the region. A few mountain rain showers are possible tonight and Wednesday. Rain will increase over the region Wednesday night and continue into early Saturday. Snow levels will be 5000 ft. in the north and 7000 ft. in the south through Thursday, then drop to 4000-6000 ft. Friday and 3000-5000 ft. Friday evening. SE-SW winds will gust to 20-30 mph Thursday and 25-35 mph Friday.

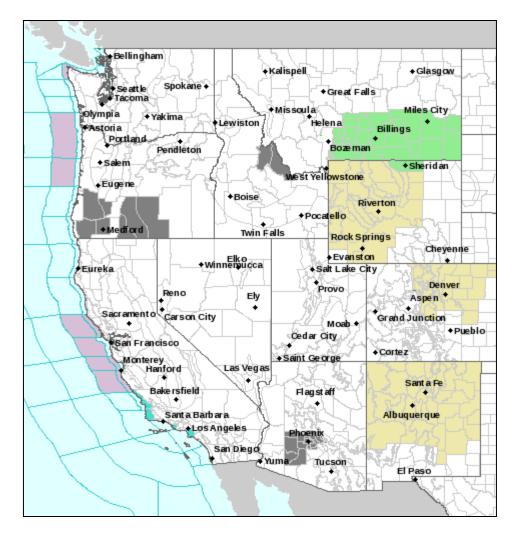

Late Saturday will be mostly dry, but another system will bring rain with high snow levels to northern areas Sunday into Monday and more wet weather will arrive during the middle of next week. Rainfall equivalent totals through early next week will range from near 0.50 inches in the driest inland valleys to 5 inches or more in the NW mountains. Other mountain areas will receive between 2 and 5 inches.

SOUTHERN CALIFORNIA

A strong ridge of high pressure over California will bring warm and dry conditions to the area today. Maximum temperatures will be 10 to 15 degrees above normal, with upper 50s and 60s across the mountains and 70s to low 80s in the valleys. Minimum humidity will be mainly in the teens. The ridge of high pressure will weaken bringing a few degrees of cooling both Wednesday and Thursday. Temperatures will be between 5 and 10 degrees above normal Thursday through this weekend as the region remains under a weak ridge of high pressure. Humidity will start to increase Wednesday and will be fairly high Wednesday night through this weekend. Abundant subtropical moisture will bring scattered light showers to Central California at times Wednesday evening through this weekend. Winds will be light through this weekend. A low pressure area may bring a better chance of some beneficial rainfall early next week.

Cal OES LAW ENFORCEMENT MISSIONS

Cal OES Law Missions

Nothing significant to report.

Cal OES MISSION TASKING

Cal OES Missions

- 2017-Cal OES-42559: Weather station installed to gather real time rainfall data by Air Resources Control Board (On Scene).
- 2017-SOC-44098: CalRecycle Debris Management Team in Ventura County.
- 2017-SOC-44022: Two E-BAM (air monitors) from Air Resources Board/Office of Emergency Response to monitor smoke from the Thomas Fires. Location one: Olga Reed Elementary School (480 Centennial St., Los Alamos); Location two: Carpinteria City Hall (5775 Carpinteria Ave., Carpinteria) (On Scene).
- 2017-SOC-43821: DTSC to remove household hazardous waste from over 500 residential lots in Ventura County (On Scene).

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
